Department of Toxic Substances Control

Public Notice

Closure Plan Approval and Closure Certification Report Acceptance for the Bulk Container Storage Unit at ConocoPhillips 1380 San Pablo Ave. Rodeo, CA 94572

The Department of Toxic Substances Control (DTSC) requests comments on the *Closure Plan Approval* and *Closure Certification Report* for the Bulk/Container Storage Unit (BCSU) at ConocoPhillips in Rodeo. If approved and accepted, the BCSU will be deemed clean closed for unrestricted use by the Department of Toxic Substances Control (DTSC). This DTSC decision would allow ConocoPhillips to continue operation of the BCSU under generator status, i.e. store hazardous waste for up to 90-days, which does not require a hazardous waste permit.

DTSC has evaluated the potential environmental impacts of this project as required by the California Environmental Quality Act (CEQA). DTSC has prepared a Notice of Exemption which states that the proposed project, with certainty, will not have the possibility to significantly effect human health or the environment.

The public is invited to comment on the *Closure Plan Approval* and *Closure Certification Report* during a 30-day public comment period, which starts on August 3, 2006 and ends on September 4, 2006. At the close of the comment period, DTSC will make a final determination after considering all comments. Mailed comments must be postmarked no later than September 4, 2006. Email comments must be emailed before midnight of September 4, 2006. Mail comments to:

Alejandro Galdamez, DTSC Project Manager
Department of Toxic Substances Control
